Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/713,328	Applicant(s) PORTER ET AL.	
	Examiner John J. Wilson	Art Unit 3732	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-16, 19, 41-43 and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by Klardie et al (5782918). Klardie shows an abutment 42, screw at 90, post extending down therefrom as shown, a plurality of resilient fingers 45, 45', intermediate wall at 60 located between the resilient fingers and a non-round section at 51 which is for anti-rotation, a greater diameter at 61, 62 than the intermediate wall as shown and through bore 81. The resilient fingers provide for a snap fit, column 2, lines 58-60 and column 5, lines 15-20, and as such, inherently comprise a feedback feature. As to claim 41, the screw shown at 90 is for axial placement and is for retaining the abutment in an implant, as such, it is inherently an axial retention screw. As to claim 42, see slots 70.

Allowable Subject Matter

Claims 1-6, 9-11, 13, 20-23, 25, 26, 28-32 and 46-48 are allowed.

Response to Arguments

Applicant's arguments filed March 17, 2008 have been fully considered but they are not persuasive. Klardie shows all the structure of claim 14 as described above.

With respect to claim 41, applicant appears to be arguing the disclosed intended use of the screw with the inferentially claimed implant, however, the rejected claim is only directed to the abutment and screw, and as pointed out above, the screw meets the claim language.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
